Social Media Content Generator

Project 22 | Prompt Engineering

Prepared by: Vinay S

1. Project overview

Goal: Use well-written prompts to make an AI chatbot create ready-to-post social media content for a small business.

Sample business: GreenLeaf Cafe is a small neighbourhood cafe that serves organic coffee, fresh sandwiches and desserts. It has free Wi-Fi and a reading corner, and it is launching a new Weekend Brunch menu.

What this document contains: a prompt formula, a reusable template, six prompts with sample outputs, a before-and-after example, and tips.

Note: GreenLeaf Cafe is a made-up business used for practice, and the outputs are samples. Replace the details with any real business to reuse the prompts.

2. The 5-part prompt formula

A good prompt gives the AI five things. A prompt with all five gets a much better answer than a short, vague one.

Part	What it tells the AI	Example
Role	Who the AI should act as	You are a social media manager for a cafe
Task	Exactly what to create	Write one Instagram caption announcing our new brunch menu
Context	Facts about the business and the audience	GreenLeaf Cafe, students and young professionals, brunch on Saturdays and Sundays, 9 AM to 1 PM
Format	Length and structure of the answer	Maximum 60 words, end with a question, add 5 hashtags
Tone	The voice and style	Warm, friendly and playful

An optional sixth part is **Do not**, which lists things to avoid (for example, a word you dislike or made-up numbers).

3. Master prompt template

Copy this template, fill in the brackets, and paste it into any AI chatbot.

```
You are a [ROLE].
Task: Write [WHAT TO CREATE] for [PLATFORM].
Context: [BUSINESS NAME] is [ONE LINE ABOUT THE BUSINESS]. The audience is [WHO]. The
goal of the post is [GOAL].
Format: [LENGTH, STRUCTURE, NUMBER OF HASHTAGS, EMOJIS, CALL TO ACTION].
```

```
Tone: [TONE WORDS].
Do not: [THINGS TO AVOID].
```

4. Six prompts with sample outputs

Prompt 1: Instagram caption

Prompt:

```
You are a social media manager for a cafe. Write one Instagram caption announcing our new Weekend Brunch menu. Context: GreenLeaf Cafe is a small neighbourhood cafe that serves organic coffee, sandwiches and desserts. Brunch is served on Saturdays and Sundays from 9 AM to 1 PM. The audience is college students and young professionals. Format: maximum 60 words, start with one emoji, end with a question, then add 5 hashtags. Tone: warm, friendly and playful. Do not use the word delicious.
```

Sample output:

> ☕ Weekend mornings just got a glow-up! Our new Brunch menu has fluffy pancakes, avocado toast and cold brew made fresh for you. Grab a friend, a book or just your appetite. We serve brunch every Saturday and Sunday, 9 AM to 1 PM. Who are you bringing with you?
>
> #GreenLeafCafe #WeekendBrunch #BrunchVibes #CoffeeLovers #CafeLife

Why it works: The role sets the voice, the context gives real facts so the AI does not invent details, the format controls the length and ending, and the Do not line avoids an overused word.

Prompt 2: LinkedIn post

Prompt:

```
You are a content writer for a small business owner. Write a LinkedIn post about why GreenLeaf Cafe switched to compostable takeaway cups. Context: the owner wants to share a small-business sustainability story. The audience is other business owners and customers who care about the environment. Format: 100 to 130 words, a strong first line, three short lessons as a numbered list, end with a question to start a discussion, add 3 hashtags. Tone: professional, honest and positive. Do not use made-up numbers.
```

Sample output:

> Switching to compostable cups was a small decision for GreenLeaf Cafe, but it taught us a lot.
>
> Three lessons from the change:
>
> 1. Customers notice effort. Many thanked us without being asked.
> 2. Small costs add up, so we explained the change openly instead of hiding it.
> 3. Start with one step. Cups came first, and straws and bags are next.
>
> Sustainability does not need a big budget. It needs a first step.
>
> What is one small change your business has made that you are proud of?
>
> #SmallBusiness #Sustainability #CafeLife

Why it works: The audience and tone lines make it sound professional, and the question at the end invites comments.

Prompt 3: X (Twitter) thread

Prompt:

```
You are a social media manager for a cafe. Write a 5-tweet thread titled 5 ways to work from a cafe without losing focus. Context: GreenLeaf Cafe has free Wi-Fi and a quiet reading corner. The audience is students and freelancers. Format: each tweet under 250
```

```
characters, numbered 1/5 to 5/5, and the last tweet invites people to visit. Tone:
helpful and light-hearted.
```

Sample output:

> 1/5 Working from a cafe can be great or a total distraction. Here are 5 ways to make it work for you. ☕🧵
>
> 2/5 Pick your seat first. Choose a corner with a wall behind you and a power socket nearby. Fewer distractions, longer battery.
>
> 3/5 Wear headphones even with no music. They tell people you are in the zone, and they soften the background noise.
>
> 4/5 Work in 25-minute blocks, then take a 5-minute break. Stretch, sip your coffee, check messages, then start again.
>
> 5/5 Fuel up smartly: a coffee, a snack and plenty of water. Then settle in. Our corner has free Wi-Fi and a reading nook waiting for you. See you at GreenLeaf Cafe!

Why it works: The character limit and numbering make the thread ready to post, and the audience line keeps the tips relevant.

Prompt 4: 30-second Reel script

Prompt:

```
You are a short-video scriptwriter. Write a 30-second Instagram Reel script that shows
how cold brew is made at GreenLeaf Cafe. Context: the audience is young coffee lovers,
and the video is filmed on a phone at the counter. Format: a table with the columns Time,
Visual and Voice-over or on-screen text, with 5 rows. Start with a hook in the first 3
seconds and end with a call to action. Tone: energetic and friendly.
```

Sample output:

Time	Visual	Voice-over / on-screen text
0-3 sec	Close-up of ice falling into a glass	Your Monday needs this.
3-10 sec	Barista pours cold brew from the jar	Our cold brew steeps for 12 hours. No rush, only flavour.
10-18 sec	Milk swirls into the coffee	Smooth, strong and never bitter.
18-25 sec	Customer takes the first sip and smiles	One sip and the day starts better.
25-30 sec	GreenLeaf Cafe counter and sign	Come try it today. Menu link in bio!

Why it works: Asking for a table with exact timings and a 3-second hook gives a script that a person can film straight away.

Prompt 5: Hashtag generator

Prompt:

```
You are a social media strategist. Suggest 15 hashtags for an Instagram post about the
new Weekend Brunch menu at GreenLeaf Cafe. Format: three groups of 5 hashtags, named
Brand and menu, Popular cafe hashtags, and Niche hashtags for a small audience. No spaces
inside a hashtag.
```

Sample output:

- **Brand and menu:** #GreenLeafCafe #GreenLeafBrunch #WeekendBrunchMenu #BrunchAtGreenLeaf #OrganicCoffee
- **Popular cafe hashtags:** #CafeVibes #CoffeeLovers #BrunchTime #FoodieFeed #CafeHopping
- **Niche hashtags:** #AvocadoToastLovers #ColdBrewAddict #CafeReadingCorner #SmallCafeLove #SlowSundayMood

Why it works: Mixing brand, popular and niche hashtags helps a post reach both loyal customers and new people.

Prompt 6: 7-day content calendar

Prompt:

```
You are a social media manager. Create a 7-day content calendar to promote the new
Weekend Brunch menu at GreenLeaf Cafe. Format: a table with the columns Day, Platform,
Content type, Idea and Hook. Use at least three platforms: Instagram, LinkedIn and X.
Tone: friendly and creative.
```

Sample output:

Day	Platform	Content type	Idea	Hook
Monday	Instagram	Teaser photo	Blurred photo of the brunch plate	Something tasty is coming Saturday…
Tuesday	X	Poll	Pancakes or avocado toast, which first?	Pick your side!
Wednesday	Instagram	Reel	Barista makes cold brew	12 hours for one perfect glass
Thursday	LinkedIn	Story post	Why we switched to compostable cups	A small change with a big meaning
Friday	Instagram	Story	Countdown to brunch	One more sleep!
Saturday	Instagram	Carousel	Menu photos with prices	Brunch is served
Sunday	X	Thread	5 tips to work from a cafe	Make your Sunday productive

Why it works: The table format and the list of platforms give a plan that can be followed day by day.

5. Improving a weak prompt (before and after)

Weak prompt:

```
Write a post for my cafe.
```

Typical result: *Come visit our cafe for great coffee and food! Open every day.* This is generic. It has no platform, no real details, no tone and no call to action.

Improved prompt: Prompt 1 above.

Result: a caption with the right length, real menu items, real timings, a friendly tone and a question to get replies.

What was added	Why it helps
Role	Sets the voice of the writer
Platform	Instagram captions differ from LinkedIn posts
Facts and audience	Stops the AI from inventing details
Length and structure	Gives a result that is ready to post
Tone	Matches the brand personality
Do not	Removes words or habits you dislike

6. Tips for better prompts

- **Be specific.** Say the platform, the length and the goal.
- **Give real facts.** Include menu items, timings and offers so the AI does not guess.
- **Set limits.** Word counts, character limits and the number of hashtags give cleaner results.
- **Ask for options.** Try Give me 3 different versions, then pick the best one.
- **Improve step by step.** Follow up with Make it shorter, Make it funnier, or Add a stronger first line.
- **Check before posting.** Read every output, fix any wrong facts and add your own personal touch.
- **Keep a prompt library.** Save the prompts that work so you can reuse them.

7. Conclusion

This project shows that the quality of AI-generated content depends on the quality of the prompt. By using the 5-part formula (Role, Task, Context, Format and Tone), one master template can produce captions, posts, threads, video scripts, hashtags and a full content calendar for any business in a few minutes.
